SUMMARY

Data Analyst with experience analyzing operational data, building dashboards, and supporting workflow improvement in large-scale fulfilment operations at Ocado Group. Skilled in Python, SQL, and Power BI, with a practical approach to turning data into clear, usable insights for business teams. Background in machine learning, predictive modelling, and data visualization.

EDUCATION

University Of East London

London, UK

Bachelor of Science (Hons) in Data Science and Artificial Intelligence (Placement Year)

Sep 2023 - 2027

EXPERIENCE

Data Analyst | Ocado Group

Hatfield, UK | Dec 2025 – Present

- Analyze operational and business data to support workflow optimization and performance improvement.
- Build and maintain reports and dashboards to track efficiency, delays, and key operational metrics.
- Work with large datasets to identify patterns, trends, and improvement opportunities to support large CFC.
- Collaborate with cross-functional teams to translate data insights into actionable recommendations.
- Support data-driven decision-making using Python, SQL, and analytical tools.

Team Member | Ocado Group (ZOOM)

London | Oct 2023 – Nov 2025

- Supported fulfilment operations including picking, packing, and dispatch in a fast-paced environment
- Monitored stock trends and flagged potential shortages to improve inventory flow
- Worked with teams to maintain operational efficiency and meet performance targets

TECHNICAL SKILLS

Programming Languages: Python , SQL

Data Visualization & BI: Power BI, Looker Studio, Tableau, Dashboard Development, Interactive Reporting

Tools & Platforms: GitHub, VS Code, Big Query, Excel (VBA, Macros), Microsoft office

Database Management: MySQL, Oracle Database, Data Warehousing

Soft Skills: Problem-solving, Team Collaboration, Data Storytelling, Critical Thinking, Prompt Engineering.

PROJECTS

Education Analytics Dashboard

[GitHub](#)

- Designed and developed an interactive Power BI dashboard, a key application for analyzing student performance and attendance trends, enabling data-driven decision-making.
- Implemented robust data cleaning and transformation processes to ensure accurate and scalable visualization and insights generation

CUSTOMER CHURN ANALYSIS

[GitHub](#)

- Built a Random Forest model to predict customer attrition (85% accuracy)
- Visualized findings and highlighted potential retention strategies
